

SIVA HARISH S

Backend Developer | Node.js | TypeScript | Flutter Developer

sivaharish0202@gmail.com | +91 6382318872 | github.com/sivaHarish02 | linkedin.com/in/sivaharish02 | Coimbatore, Tamil Nadu

PROFESSIONAL SUMMARY

Backend Developer with **2+ years of experience in Node.js, Express.js, and TypeScript**, developing scalable REST APIs and production backend services. Experienced in **MySQL, Prisma ORM, Redis, payment integrations, webhooks, third-party APIs, and performance optimization**. Strong background in production troubleshooting and Linux VPS deployments.

TECHNICAL SKILLS

Backend & Frameworks: Node.js, Express.js, TypeScript, JavaScript, REST APIs, RESTful API Development

Databases & ORM: MySQL, MongoDB, Prisma ORM, Schema Design, Query Optimization, Indexing

AI & Vector Database: ChatGPT Integration, ChromaDB, Vector Database, AI Chatbot Development

Caching & Performance: Redis, Session Caching, API Response Caching, Query Optimization, Performance Tuning

Cloud & DevOps: AWS S3, Linux, VPS Deployment, Git, GitHub

Integrations: Razorpay, Webhooks, Third-Party APIs, Firebase Cloud Messaging (FCM), WebRTC

Frontend & Mobile: Flutter, Dart, React.js, Deep Linking, Android App Links

PROFESSIONAL EXPERIENCE

Backend Developer Node.js | Flutter Developer | ELANOXTECH

July 2024 – Present

- Engineered and managed **150+ production REST APIs** using **Node.js, Express.js, and TypeScript** for mobile and web applications.
- Designed and built scalable **backend APIs and server-side business logic** for production mobile and web applications.
- Integrated **webhook-driven payment processing with Razorpay**, improving payment reliability and preventing payment-success/order-failure inconsistencies.
- Applied **Redis caching** for session management and frequently accessed API responses, reducing database load and improving API response performance.
- Tuned **MySQL database queries, schemas, and indexing** to address slow query bottlenecks and improve backend performance.
- Migrated production databases from Latin encoding to **UTF8MB4**, enabling multilingual, special-character, and emoji support while preserving data integrity.
- Integrated and managed **third-party APIs and services**, troubleshooting integration failures and API-related production issues.
- Built a scalable **Firebase Cloud Messaging (FCM)** notification system with optimized token lifecycle management to improve notification delivery.
- Streamlined **AWS S3 media storage and delivery workflows**, reducing unnecessary storage operations and improving media delivery performance.
- Deployed and managed production applications on **Linux VPS** and diagnosed critical production incidents.
- Troubleshooted and resolved complex backend issues including **memory leaks, API timeout failures, slow database queries, performance bottlenecks, and third-party integration errors**.
- Debugged and improved **WebRTC signaling architecture**, improving video-call reliability across mobile and web platforms.
- Developed Flutter applications integrated with **Node.js backend APIs, Firebase, push notifications, and deep linking**.

KEY ENGINEERING ACHIEVEMENTS

- Payment Processing:** Architected webhook-verified backend payment processing to maintain reliable order status even when applications close or networks fail.
- AI Chatbot:** Developed an AI-powered chatbot using **ChatGPT and ChromaDB** to provide contextual responses based on application-specific data.
- Database Optimization:** Led production database encoding migration to UTF8MB4 while preserving data integrity with zero downtime.

KEY PROJECTS

Ovantica – E-Commerce Mobile Platform

Technologies: Node.js, MySQL, Razorpay, Redis

- Built and maintained **Node.js REST APIs** for e-commerce order and delivery management workflows.
- Established **order lifecycle, cancellation, refund, and delivery management** logic.
- Integrated **Razorpay, Snapmint, and Tally** with webhook-based payment and business-data workflows.
- Built **admin plan management** and related backend business logic.
- Created an **AI-powered chatbot using ChatGPT and ChromaDB vector database**, enabling contextual responses based on application-specific data.
- Streamlined **Redis caching** and optimized database queries for better API performance.
- Troubleshoot production issues involving **payments, orders, APIs, database queries, and third-party integrations**.

Virtual 2 Live – Live Streaming & Event Platform

Technologies: Node.js, Express.js, MySQL, Flutter, Firebase, WebRTC

- Built **Node.js REST APIs** for live events, user management, real-time communication, and platform workflows.
- Implemented **WebRTC-based video calling and real-time chat** with optimized signaling for reliable communication.
- Configured **Firebase Cloud Messaging (FCM)** push notification workflows with token management and event-based notifications.
- Enabled **deep linking and Android App Links** for seamless navigation between mobile and web content.
- Built event-management workflows supporting **live sessions, user interactions, and real-time updates**.
- Diagnosed and improved production issues involving **WebRTC signaling, APIs, notifications, and real-time communication**.

Nanjil Mart — E-Commerce Platform

Technologies: Flutter, Node.js, Prisma ORM, MySQL, Razorpay

Built e-commerce functionality including product, category, stock, order processing, Razorpay payment integration, and admin-panel features.

CRM Lead Management System

Technologies: React.js, Node.js, MySQL

Built lead-management functionality including IndiaMART lead integration, employee management, customer tracking, reminders, and dashboard analytics.

EDUCATION

Master of Computer Applications (MCA)

RVS College of Arts and Science, Coimbatore

2022 – 2024
